

In the era of information explosion, we learn overwhelming amounts of new knowledge every day. The information about personal health care is no exception. Various kinds of nutritious ingredients, which you may or may not have heard of, all sound indispensable for health maintenance. As a result, every household is stocked up with numerous nutrition and health products with various functions, bought from shopping malls or online. Are they of any good? ... No idea.

"Protecting the health of the loved ones is the fundamental philosophy."

HEALTH PHILOSOPHY OF SIMPLIFICATION

At UzestA, we take nutrition and health care to a whole new level. We start from the consumers' perspective and uphold the product philosophy of "Simplification". Only the latest and the most effective nutritional ingredients are selected. UAT, the cutting-edge technology is used to offer high-quality and effective health products that are suitable for the whole family. Integrate nutrition and healthy food into daily life. Keep it easy and simple.

Simplification.
Simple, yet also not simple.

- ✓ Plant-based astaxanthin from red algae is a self-protecting compound produced in extreme environments. It is a Japan patented material with EU and US process patents, combined with Compound Berry Extract from French grapes and Canadian wild blueberries for rich phytonutrients.
- ✓ Proprietary Double Layer Coating Technology encapsulates three selected beneficial bacteria to help maintain digestive function, support gut flora balance, and overall protection.

- People who frequently use IT products
- People who tend to read for a prolonged period
- People who spend a lot of time outdoors
- People who want to improve their focus
- People who want to improve protection

A woman with blonde hair tied in a bun is smiling and talking on a pink mobile phone. She is wearing a white short-sleeved t-shirt and dark high-waisted trousers. A watch is visible on her left wrist. She is holding a light-colored jacket over her left arm. In the foreground, there is a basket filled with various folded clothes, including a striped shirt and a white shirt. The background is dark and out of focus. The text 'PRODUCT INDEX' is overlaid in the center, and the 'UzestA' logo is at the bottom.

UzestA™

UAT

(Unique Advanced Technology)

Innovation comes from the tests of time and experience. UzestA calls on experts from fields of nutrition and health, focuses on the trend of development in the related areas, and is constantly searching for and selecting the latest high-quality nutritional ingredients. After numerous experiments and tests, it has figured out the perfect formulas.

Meanwhile, by applying the globally advanced technology and in collaboration with PIC/S GMP certified factories, UzestA created its top-notch health food products. All of the products have passed 380 Pesticides Residues Testing, 365 Chemicals for Clinical Use Testing, Microbial Testing, and Heavy Metals Testing, by SGS, the Swiss testing agency. This meticulous process of research and development is what we call the "UAT Technology".

FULL EVOLUTION FOR FUTURE

- ✎ Daily Nutritional Needs
- ✎ Improve Digestive Functions
- ✎ Maintain Youthful Vitality

VitaPro S.R.M Capsule

Servings: 30 Capsules / Box Member Price: US\$ 148

VitaPro supplies 15 vitamins, 11 minerals and trace elements, plus 10 types of probiotics and other important nutrients. Each capsule contains more than 1,000 micro-pellets. Each pellet encapsulates 36 nutrients. With the Sustained Release Micro Pallet Delivery Technology, the nutrients are continuously released for 8 hours and can supply your daily health needs and help the body maintain normal functions.

- ✓ 15 Vitamins and 11 Minerals to provide the body with the nutrients of daily needs
- ✓ 10 specially selected types of probiotics to improve physical health, help maintain digestive functions, and relieve constipation
- ✓ Innovative pellet encapsulation technology that uses a special polymer membrane to fully protect the nutrients and offer a sustained and even release, which improve nutrition bioavailability and reduce waste.
